Agile & Lean Scrum Master

Description

Agile & Lean Scrum Master is a 2-day course that addresses the attributes of the Scrum Master, and how this person integrates with team members, key stakeholders, and organizational leaders to assure a project's success. Students will learn what it means to be responsible for championing the needs of the team to the organization and for championing the needs of the organization to the team. The Scrum Master is the team's enabler and facilitator who assures that the team functions within the agreed-to Scrum practices while acting as a mediator and negotiator between the team and the greater organization.

Also, it is recommended that persons with less than 2 years of Agile or Scrum experience take the *Agile & Lean Essentials* course to ensure a thorough understanding of the values, principles, and practices of Agile, Lean, and Scrum, and the terminology commonly used by practitioners of those methods.

Why Attend?

The goal of *Agile & Lean Scrum Master* is to provide new and experienced Scrum Masters with a significant body of knowledge and enhanced skills to perform this important role throughout a project's development lifecycle. The course explains in detail many of the concepts and techniques introduced in the *Agile & Lean Essentials* course.
